

The workshop presents control tasks (in a form of crosswords) for students of medical higher establishments. Anatomy terms, used in the workshop, match international anatomical nomenclature – official international standard. The workshop is devoted to congenital malformations of the fetus and human developmental abnormalities. The information is adaptable for first and second-year students of medical, pediatrics and dentistry faculties of higher educational establishments in accordance with Federal standard. Correct responses to the questions are presented in the appendix. The workshop includes 15 crosswords and 225 questions.
